Surgery in the 3rd millennium

Dear Colleagues and Friends,

We are delighted to invite you to the upcoming edition of “Surgery in the Third Millennium: Skills beyond Gender,” which will be held in the vibrant city of Milan in May 2025.

This congress will focus on highlighting the skills of urologists, regardless of gender, and fostering an environment where talent and expertise take center stage.

We have the pleasure of welcoming a group of accomplished female urologists who will be performing live surgeries, demonstrating the latest techniques in the field. Accompanying them, a panel of esteemed colleagues will guide the discussions, sharing their own experiences and insights to stimulate a rich and engaging dialogue.

Our mission is to shine a spotlight on the surgical skills and professional excellence that transcend gender, while also showcasing the evolution of urology as a diverse and inclusive specialty.

From laparoscopic and robotic interventions to cutting-edge innovations in endourology, this event promises a comprehensive and thought-provoking scientific program.

The aim is not only to share knowledge but also to challenge stereotypes, fostering a community that values expertise and dedication above all else.

By providing a platform for these exceptional professionals, we hope to inspire the next generation of urologists and affirm that talent and skill know no gender boundaries.

We look forward to seeing you in Milan, as we come together to celebrate the achievements of all urologists and continue advancing our specialty towards a brighter, more inclusive future.

Warm regards,

Franco, Maria, Silvia
